

## Attachment C

# What to do with a spill

- Clear area of all non-essential personnel
- Stop the flow of material if possible
- If liquid material, dike the area if possible
- If powder material, isolate and contain the area
- If gas, **immediately evacuate the area**

## If a hazardous material is involved:

- If the spill or release exceeds the ability of on-the-scene personnel to handle or **safely** contain it...or
- If the spill or release is more than the reportable quantity...or
- If the material has entered the sewer, drain, or waterway,

**Immediate notification to 911 is required**
