MSD hosts water quality professionals for latest in industry solutions

LOUISVILLE, KY– On Tuesday, December 5, Louisville MSD will host the Technology Approval Group of the Ohio Valley and Midwest regions at its Main Office, 700 W Liberty Street, 8:30 AM to 3 PM. The group will review the industry's latest emerging technology solutions. While the event is closed to the public, media are welcome to attend.

Technology Approval Group (TAG) is a global innovation forum of the world's leading water utilities. The TAG model was first launched in the UK in 2005 and has grown over the years into various parts of the world.

This forward-thinking, early-adopting group seeks to advance the water and wastewater industry, by testing new technologies to find more efficient, cost-effective ways to serve their communities. Regional TAG workshops are facilitated by Isle Utilities, a company, which operates globally to accelerate innovation through the identification and qualification of technologies and best practices.

About MSD

The Louisville/Jefferson County Metropolitan Sewer District (MSD) works to achieve and maintain clean, environmentally safe waterways for a healthy and vibrant community. The organization's more than 600 employees provide wastewater management, drainage and flood protection services across the 376 square miles of Louisville Metro. In addition to operating and maintaining Louisville Metro's sewer system, floodwall system, water quality treatment centers and flood pumping stations, MSD invests in hundreds of infrastructure improvement projects each year, plants more than 1,000 trees and other vegetation annually to enhance water filtration and reduce runoff, and provides numerous outreach programs to inform and educate the community about protecting our waterways.
