## **MSD Executive Director appointed to EPA Financial Advisory Board**

LOUISVILLE, KY—MSD Executive Director Tony Parrott has been named to the Environmental Financial Advisory Board (EFAB) of the U.S. Environmental Protection Agency for a two-year term. As an advisory board member, Parrott will represent Louisville MSD (Louisville and Jefferson County Metropolitan Sewer District).

The EFAB provides ideas and advice to the U.S. EPA administrator and program offices on ways to lower the costs of and increase investments in environmental and public health protection.

Parrott states, "I am honored to represent Louisville in national environmental discussions concerning regulatory requirements, and how our community can influence policy and gain access to innovative financing alternatives. It is important that our nation address replacement of the critical service systems for drinking water, wastewater treatment and flood protection. My involvement with EFAB will benefit the Louisville community and the water industry as a whole."

Parrott has 30 years of public utility service. He has served as Louisville MSD Executive Director since 2015. Previously, Parrott served as the Executive Director of the Metropolitan Sewer District of Greater Cincinnati and the Greater Cincinnati Water Works. He is a member of the Board of Directors for the National Association of Clean Water Agencies (NACWA) and was named Public Administrator of the Year in 2013 by the American Society of Public Administrators.

### About MSD

The Louisville/Jefferson County Metropolitan Sewer District (MSD) works to achieve and maintain clean, environmentally safe waterways for a healthy and vibrant community. The organization's more than 630 employees provide wastewater management, drainage and flood protection services across the 376 square miles of Louisville Metro. In addition to operating and maintaining Louisville Metro's sewer system, floodwall system, water quality treatment centers and flood pumping stations, MSD invests in hundreds of infrastructure improvement projects each year, plants more than 1,000 trees and other vegetation annually to enhance water filtration and reduce runoff, and provides numerous outreach programs to inform and educate the community about protecting our waterways.
